

How To Find Invite & RSVP (Guest Edition)

You've been invited to a wedding using **The Wedding App** — how exciting!
Here's everything you need to know to get started and connect with everyone attending the big day.

📄 **Important Note:** You can't search for someone's wedding inside the app. You must be **directly invited** by the couple through a **text link** or **QR code** found on their invitation.

Step-by-Step Instructions

1. **Access Your Invite:** Scan the **QR Code** or click the **invitation link** you received from the couple.
2. **Create Account:** If you're **new to The Wedding App**, you'll be asked to **create an account**. This gives you access to the **itinerary**, **RSVP**, and the ability to **chat and connect** with other guests.
3. **Link Your Account:** If the event doesn't automatically appear after creating an account, simply **exit the app and rescan or click the link again** to ensure your account is correctly linked.
4. **Navigate Upcoming Weddings:** Your main page, "Upcoming Weddings," has two tabs: **Confirmed** (weddings you've RSVP'd "Yes" to) and **Pending** (weddings you've been invited to but haven't RSVP'd yet).
5. **View Details & RSVP:** Tap the 👁️ **Eye Icon** to **View Details**. Your access will be limited until you RSVP.
6. **Unlock Full Access:** Once you RSVP "Yes," you'll unlock **full access** to all features. Your event will automatically move from **Pending** to **Confirmed**.

Tips & Tricks

Plus One Reminder

If you have a **plus one**, ensure they **create their own account** and **follow the same steps** to register their RSVP. Every guest needs their own profile.

One Account, Many Weddings

Once your account is created, it's **one and done!** If you're invited to any other weddings using The Wedding App, those events will automatically appear in your profile.
